About us

CEO Salah Atamna

In 2003 Salah Atamna founded the Europe Health GmbH. Europe Health is committed to assist patients living abroad and looking for the best medical care in European countries with making choices and taking over the organization of the complete travel as well as of the hospital stay (medical tourism).

The services are directed towards premium segment medical tourists who are coming from the Arabian Region mainly.

Health Care is the branch of the present and the future. It is subject to a continuous change because of the rapid development in the areas of medical research & technology, information technology and pharmacy. Nowadays, nearly everybody can keep track of this development due to the worldwide availability of information about it. This however, gave people all around the world the willingness to participate in this evolution.

Because of that, it is a challenge to fulfill the demands of health care services for the countries that want to follow this development very closely.

Therefore, it was necessary to have a central point of coordination which covers all health issues and serves as a platform for obtaining information along

with providing all required services.

Europe Health unites all these services of the overwhelming field of health care and offers their customers this much needed platform, by providing them with all four services:

- » [Patient services](#)
- » [Tourism](#)
- » [Tele Medicine](#)
- » [Marketing](#)
